**Tweaking.com - Repair Missing Start Menu Icons Removed By Infections Download [Mac/Win]**

This program is designed to work with all Windows platforms including Windows ME, Windows 2000, Windows XP and Windows Vista. Windows Vista users can use this program to easily and quickly restore the missing icons on the desktop and the Start menu. The program also allows you to save a standard menu template so that you can just load this template instead of creating one from scratch when you need to add a new program or application.

---

The program also allows you to load any of your startup windows without the desktop, or to remove them from the startup windows. Some of the main features include: - Restore the missing icons on the desktop and the Start menu. - Load and save a standard menu template. - Customizable keystrokes to make shortcuts to any function or application. - Ability to remove any of your startup windows from the desktop or the Start menu.

**O.J. Keuntje's Portfolio / Investors Query Tool** The O.J. Keuntje's Portfolio / Investors Query Tool is designed to help investment professionals automate their research tasks for Portfolio Management purposes. This is very valuable to asset managers, CIOs and other investment professionals who need to manage their investments and data, in real-time.

**MS-Explorer's Active Desktop Settings** The Active Desktop Settings is a simple tool that allows you to change various settings that you would typically want to change on the desktop. You can change the name of the desktop folder, change the desktop wallpaper, change the desktop icons, show and hide your desktop, and show the desktop in either a windowed or full-screen mode.

**Desktop Express Mail** Desktop Express Mail is an easy to use tool that is designed to automatically send and receive email directly from a user's desktop. Desktop Express Mail makes it easy to automatically perform tasks such as saving attachments to your desktop, capturing email signatures, replying to incoming email, and even scheduling emails to be sent in the future.
