LongoMatch Crack +

What's New In LongoMatch?

Detailed analysis of a soccer game or any other sport with video files. With it, you can tag various plays, review certain portions of the game in slow motion, add annotations, create a playlist with all the important moments, modify the lead and lag time of each play, export projects to CVS and much more. All of this is done through an interface that looks user-friendly but is a bit difficult to make out at first. Since this isn't your typical application, you might have a difficult time when it comes to understanding the functions and features and most importantly, how they connect with each other. Process local videos and feeds A project binds to the source video so you can only create just one for it. Despite this, you are able to tag important plays and group them into up to 20 categories. This should be enough for an entire match, regardless of its type. The plays can then be reviewed with just a simple click, making their study a lot easier. In a lot of cases, you'll need to see the action in a play more than once. LongoMatch allows you do this as many times as you want and in addition, it offers you the chance to slow down the frame rate during playback so you can view the entire action in slow motion. LongoMatch enables you work with video material that is stored on your computer, as well as with feeds from various capturing devices and IP cameras. This gives you the freedom to analyze a game in any situation. And since a game analysis can't be complete without a report, you'll be pleased to know that LongoMatch is capable of generating game, category and player stats. To end with In closing, LongoMatch might be a bit difficult to make out at first but with a little practice, it turns into a reliable coaching tool that you can certainly use to improve the game style of almost any team and sport. Features: - Process local videos and feeds - Create projects from local files - Analysis video content (from local videos, IP cameras or feeds) - Create playlists - Export projects to CVS - Tag plays with up to 20 categories - Follow and comment on plays - Update tracking data - Automatically detect plays - Generate statistics for each play - Playlist analysis - Free & Open Source - Windows, Linux, Mac - Supported formats: AAC, MP4, MOV, M4V, 3GP, MKV, OGG, OGM, QT, WebM, VP8, WEBM, ASF, FLV, MP3, M4A, AAC, AU, SAC, MP2, MP1, MPA, MID, SID, RAM, REAL, XVID Lucamatic is a new experimental application that
