What's New in the Phlox?

Phlox is an easy-to-use Windows XP inspired system tray application that helps you to rename the file when you need to. The name of the file is selected by the application, not the extension. The user will not need to change any files because this application will rename file. The application is intended to be placed on the desktop and use one of the following icons: PhloxIcon, PhloxDefaultIcon, Phlox2Icon. If you want to use Phlox, you must copy and paste file on the desktop. Details: Open file with Phlox application: When you click to open a file, you can choose an icon by selecting an icon from a list, a Windows Vista style dialog. The file name and the extension are displayed in the dialog. Features: - Support multiple extension renaming. (this feature can be changed by clicking "Options") - Support multiple file name renaming. - Modification of file name is previewed while renaming. - Renaming of file name is done without closing the file. - Set custom icon for system tray application. - Set custom title for window. - Placement of system tray application: On the right or left side of the desktop. Optional Features: - Move the application with Alt + right click. - Move the application with Alt + left click. - Move the application to trash with Shift + right click. - Move the application to trash with Shift + left click. - Apply font style to the name in the dialog. - Replace the user name and the path in the dialog. - Set custom name in the dialog. - Set custom icon in the dialog. - Enable or disable the Windows Vista style of the application. - Enable or disable the new window title. - Enable or disable preview file name change. - Enable or disable quick renaming. - Enable or disable the option to show the file path in the window. - Set option to show or hide the size of the window. - Enable or disable the option to show or hide the options. - Enable or disable to show the custom name on the name in the dialog. - Enable or disable the auto close of the application. - Enable or disable the option to close the application window on Alt+F4. General Settings: - Automatic update (can be enabled or disabled) - Automatically start the application (can be enabled or disabled) - Display the application in the tray. General Settings: - Maximum number of files to rename at once. - Maximize the application when it is started. - Application name and title are customizable. - Display maximum number of open windows in the tray. Options Settings: - Select a file in the current directory to rename - Change the order of files to rename.

System Requirements:

Storage space needed: 10 GB Processor: Intel Core 2 Duo 3.2 GHz or higher Memory: 1GB RAM Graphics: NVIDIA GeForce 8800 GTX or ATI HD4870 or higher DirectX: Version 9.0 Network: Broadband Internet connection So how many reviews have we posted for Bloxx? To date, we have made several features available to our readers. The Full Review is a discussion of the whole game, the Gameplay Overview is what you would expect a review to look like when
