To start using it, click on the executable to start the installation process. Getting started For starters, open Windows Explorer and create a new folder. Name the folder something that works for you. Once you've created the folder, a shortcut will be created to the file explorer inside that folder. Right-click on the shortcut and click on Properties to make some changes. You can add an alias to the shortcut, which will allow you to open the file explorer by typing the name. Once you have your shortcut, you're good to go. You can keep it inside the folder with the rest of the files or outside the folder. You can move the folder and still have your shortcut. Features The file explorer works well with FAT16/FAT32, NTFS and HFS. A few of the features include: - Displays files, folders and any other object stored in the folder. - Display properties for each file. - Allow you to share folders with other computers. - Display the hidden files and folders. - Opens programs 77a5ca646e
