Excerpts from document - Computer on Cables Users can set the Alarm Memory message, reset or test all the alarms. The Language and Keypad defaults are established at startup and cannot be altered. The Alarm Memory is initialised and the displayed message is stored on the last setting used.. As the PRX calls the ABC(), the user may contact the operator who can reset the Alarm Memory message.. 1201.. If the APD is turned off, the Alarm Memory message will be displayed.. APD can only have one alarm memory assigned to it. if the APD is turned off the user may reactivate the APD or deactivate the alarm using the reset button.. 2 Pdf manual for PDX4040. Manual Pdf Overview of AF Function. The AF-Illumination Switch (LS) provides illumination of the AF.. An illuminated LS signal is generated by the AF-Illumination Switch when it is not pressed.. The LS button is used when using an AF-mounted camera to illuminate the subject area for autofocus.. The LS button has two modes: Illumination and lock.. The AF-Illumination Mode is used when the camera is to be used in the same room as the subject under the illuminated AF.. This document describes the basic functionality of the AF-Illumination Switch and the AF-Illumination Mode. This switch is controlled by the last selected AF mode and AF function.. - Lock - If Illumination is selected, lock is selected to prevent inadvertent illumination.. - Illumination - Illuminate the subject area.. - Lock - Illuminate the subject area.. The illumination cannot be turned off if:. When illuminated, the switch is in the Lock state.. The AL-LOCK in the AF-MODE is set to 25.. You can select the illumination either manually using the LS button or. When the AF-Illumination Switch is illuminated, it changes to the Illumination

---

state.. The keypad must be in the Lock or Illumination state to select a different illumination mode.. If the illumination mode is Illumination and the person leaves the room, the switch goes back to the illuminated state.. If the switch is set in the Illumination mode, any subsequent light signal from the switch will change the switch state. AF-Illumination Switch is an illumination switch. You can set it to
