They can work directly from 3-D modeling packages and can save their designs to the file system for 3-D printing and 3-D print objects. CAD operators may import CAD models to AutoCAD by using a CAD file format or CAD sheets. CAD operators can then modify and edit their 3-D model with the help of AutoCAD tools. They can also download additional CAD files. They can combine CAD sheets, or parts of CAD models, with basic CAD shapes or parts of the 3-D model. They can also convert between 2-D and 3-D formats. In addition to the traditional CAD programs, CAD operators can use 3D software such as 3D Max and 3D Studio Max to create 3-D models for AutoCAD. Other software programs, such as SketchUp, Google Sketchup, Google Earth, SketchUp 3D Warehouse, and SketchUp Pro, can also be used to create 3-D models.
