Ask HN: Is there a good job board like Craigslist for developers? - Ostenjit Hi, With the release of this year's Android OS, I'm looking for a new job, but being a Windows developer I tend to use a Mac a lot, which means I'm having a hard time finding Android jobs. A really basic job board only seems to list jobs that are more than a month or two old.Is there any job boards that just list job vacancies and are not limited to a certain company?Thanks. ====== roml I like Stack Overflow Careers: [b7e8fdf5c8

What's New In?

------------------ This is a simple orga-charting tool. As S.T.A.L.K.E.R. is so much about exploring the unknown, the core design concentrates on helping a user explore and discover the unknown, while the system itself is relying on the user's decisions. This should be achieved in S.T.A.L.K.E.R. with the use of both Organigrams and information walls - people/objects that pop up as information (or anything else) when they pass by an area/object the user is searching for. Such information could be 'temporary', as in 'Link: ' - or it can be 'permanent', such as a list of things and how to get there, or information about what you are looking at. These could be placed right next to each other, so the user could link as many things as possible. In essence, most objects in S.T.A.L.K.E.R. could be combined in an Organigram - so you could take a whole map and turn it into a hierarchy of objects. Of course, this is just my first impression of S.T.A.L.K.E.R. and its Organigrams - I would like to see a real implementation of this. Pros / Cons: ------------------ + Easy to use. + Mainly a GUI interface (I liked the main menu). + Compatible with.NET, Java, Arduino, OpenGL, etc. + Unobtrusive, allowing the user to explore the landscape. + Screenshots of the maps are stored in a.sit file in S.T.A.L.K.E.R.\Documents\S.T.A.L.K.E.R.\Screenshots\maps.sit, which could be used in the beginning of the game. + Info-Words are displayed according to the terrain the object is in. + Allows for a user-friendly, yet advanced system. + You can create new objects right in the Organigram area. + You can have a starting point for your Organigram. + You can have different types of objects from the start of the game. + Allows
