Preparation and properties of poly(2-methacryloyloxy-ethyl phosphorylcholine)s. Polymers containing phosphorylcholine groups derived from 2-methacryloyloxyethyl phosphorylcholine (MPC) were prepared with different methods such as radical polymerization, anionic polymerization, and monomer-template polymerization. The polymers were characterized by measuring their molecular weight, gel permeation chromatography, circular dichroism (CD), infrared (IR) spectroscopy, and (1)H-nuclear magnetic

#### **What's New in the Ancient Castle 3D Screensaver?**

Mojang gives it to us and it comes in the form of Minecraft: The Builders Update 1.3.0, a massive update that includes tons of new features and content for you to explore. Like the title suggests, you get building tools that add a lot of new creations to Minecraft, ranging from bridges and tunnels to... well, everything

---

else! This update also continues the tradition of adding new blocks to the Minecraft world, which are some of the most requested types from all of the other updates so far. In this review I will be covering the features added in 1.3.0, going over some of the new items you can build, and giving you an overall idea of how it feels to play Minecraft: The Builders Update. A New Start The update brings a lot of new things to Minecraft. Not only can you construct structures, but you can craft new items. The update introduces a series of new crafting tables that allow you to make some of the items Minecraft is known for. Flint, Cobblestone, Redstone, Netherrack, and more This update adds 4 new crafting tables that let

---

you make new items based on the previously mentioned items. Each table can be used to create one of the previously mentioned items, and they are all pretty easy to make. For example, make 3 Cobblestone out of Cobblestone, Flint, Iron. Netherrack Netherrack comes in several pieces that can be crafted from the new forge item. Anvil: This item will create a redstone powered forging hammer Nether Pole: You can craft a wooden pole and use it as a redstone powered pickaxe or something else if you wish. Nether Torch: You can craft a redstone powered torch. Blaze Rod: You can make a redstone powered torch. The download is available for Windows only. Conclusion: I've been playing Minecraft

---

for a while now, and I must say, I really like this update. The new crafting is very fun to play with, and the items you can build are really interesting. If you haven't played Minecraft in awhile, I suggest that you check it out again. If you want to read more Minecraft videos, check out: Minecraft users have been aching to play Minecraft Forge for a long time now. Today is the day when Minecraft Forge is finally here!
