Some of the most exotic Weapons and Armors skins in this brand new game. Collect and improve rare Weapons and Armors. Case Opener provides: - The most realistic representation of opening - Skin inventory - A user-friendly interface - All game functions available from the start - no need to level up! - Inspect Items - Preview Skins - Weighted Skins

Why We Choose Case Opener: We chose Case Opener for several reasons: We've been playing this game for over 8 years and we never had any major issues with it! We wanted a long term reliable solution and Case Opener allows us to do exactly that. Case Opener worked well with all of our existing software (especially with Quest Tracker which enabled us to import every single item into Case Opener and see every skin, weight and value) and we could never have managed that without it. Case Opener was reasonably priced and Case Opener was ready to start work when we did. Case Opener enabled us to achieve an inventory system which is unparalleled for its realism. The Case Opener web app has just been updated and we can now search using up to 200 search terms. We have also added the ability to sort items by type (Weapon, Armor, Weapon + Armor, Weapon - Armor), weight, value, origin and rarity. We've also added options to sort by popularity and upgrade history. Request a support ticket if you're interested in getting started with Case Opener: -----

The game is absolutely FREE to download and play, there is no paid DLC and we never intend to add any. What's new:

Today's Tuesday Edition continues our ongoing look at Soccer Management for your iOS and Android devices by digging in deeper to the Top 15 Global Clubs with our monthly release, which comes out every Tuesday. Every month we take a look at the 15 Global Clubs and go through the steps necessary to become a first division World Class Soccer Club. By the end of the series you should be well on your way to running your very own professional soccer club. Special thanks to RedZone Soccer for their contribution to this release, and we look forward to the Monthly Release in the New Year of 2018. In January 2018 we'll be looking at Player Acquisition and Traveling Rosters, in February we'll have a special look at the 15 Global Soccer Clubs with an emphasis on the Clubs without a Space to Grow in Space Management, and then in March we'll focus on adding Scoring Minds and Tenure. As this is a series focused on sharing a learning curve and how to get from where you are now, we'll only be looking at clubs that operate in a country with at least a small domestic league. Each month we'll complete the review process and share what we think are the vital lessons learned and you can then continue to play with the Club in a second testing review and so on. As well as this series of reviews each club that had at least a success-full season last year has had the chance to re-sign many of their old players for a new season. This will help speed the curve this year and give them all the chance to get their games lined up and training up all together. SPECIAL NOTE You will need to properly establish the number of teams that a club will have as thats how many games they will play. You do not have to update your fixture list as this is done for you. However you may wish to open an update log if you wish to track the number of key improvements made over time. The Global Soccer Clubs Index The Clubs included in the Index continue to be assessed based on a set of criteria. It is important to note that while they should be strongly on track for a World Class progression in the upcoming season (particularly those who did not advance in 2015-2016) they have not been determined to be a true World Class Soccer Club just yet.

- There are no bugs or glitches, or if there is, they're not in gameplay
