Q: SQL query using count and union I'm attempting to write a SQL query that select ALL NEW users from my table that have not yet been activated and have a balance of $500 or more. The issue I'm running into is that I've to count how many customers exist in each group and I'm not sure how to count the amount of customers

that have not yet activated and have a balance of $500 or more. Can anyone help me? I've tried the following, but it only returns one customer per group, I want it to return all the customers in each group. SELECT TOP 1 user.id, user.first_name, user.last_name, user.email, user.created_at FROM users AS user JOIN (SELECT user.id, COUNT(id) as

'totalCustomers' FROM users LEFT JOIN users_Balance on users.id = users_Balance.id WHERE users_Balance.balance > 500 GROUP BY id UNION SELECT user.id, COUNT(id) as 'totalNewCustomers'

The Gradient tool can be used to make smooth transitions between images in a painting or a photo. The Gradient tool can

also be used to add color to a photo or to create gradients. The Pen tool is the most useful tool in the PhotoShop arsenal. You can use it to create virtually any shape imaginable. The Curves tool is used to add or alter sharpness, brightness or contrast to an image. The Master and Detail controls are used to adjust exposure, hue, saturation, and contrast. They allow you to adjust the overall

look of your image without affecting the tones or details. The Eraser tool lets you select and delete pixels. The Channels palette provides the ability to make color adjustments to specific areas of an image. This tool offers an alternative to the Hue/Saturation dialog box. Toning is a technique that uses color to soften images. Tone varies the brightness of an image's colors while retaining

the overall color of an image. The Shadows/Highlights dialog box lets you apply a different color to various areas of an image. With this tool, you can make shadows and highlights darker or lighter without affecting the overall tone of your photo. There are many more options, including a History palette, which lets you adjust, move, copy and paste colors from one part of your

image to another. The History Palette (right) allows you to alter, move or copy colors or other details from one part of an image to another. The History palette (right) also lets you save information about the last image you worked on so you can easily return to it later. You can use Photoshop's Properties panel (right) to learn more about and change the appearance of an image. For

example, you can alter the brightness, contrast and tint of an image, add labels, change the filename and description of the image, and choose a default format for files. The Type Tool makes text elements like fonts and characters, such as smiley faces or balloons. It lets you move text elements up and down and rotate them. You can use the Magic Wand Tool to select an area of an image, for

example, to make it easier to erase unwanted elements. This feature allows you to access a Selection mask, which lets you apply Photoshop tools to specific parts of an image. For example, you can use a Selection mask to delete pixels and fade them away, or add color to shadows or light areas. You can use the Blend if
