You can easily enjoy downloaded 4K videos, desktop and mobile content. The headphones and microphone are also good.Multicentric reticulohistiocytosis associated with lymphoproliferative disorder. Multicentric reticulohistiocytosis is a rare, benign, progressive systemic disorder of unknown etiology. A variety of cutaneous manifestations have been reported, but they are usually limited to the skin. The authors describe a patient with a rash that progressed from the face and the extremities to the neck, axillae, trunk, and genitalia. Microscopic examination of affected skin revealed a Langerhans cell histiocytosis. The patient had an associated peripheral lymphoproliferative disorder and an elevated level of serum immunoglobulin G. To the authors' knowledge, this is the first description of multicentric reticulohistiocytosis associated with Langerhans cell histiocytosis and an elevated immunoglobulin G level.Fitbit Inc (NYSE:FIT) shares hit a new 52-week high today after the sports wearables maker announced that it has entered into a
